

Procedure Spotlight:

THE ULTIMATE DUO!

coolpeel. +  VIRTUE_{RF}

The Ultimate DUO is our exclusive combination treatment featuring VirtueRF microneedling and CoolPeel CO2 laser resurfacing.

Together, these options work to rejuvenate your skin's surface while also boosting collagen remodeling at a deeper level. It comes without significant downtime, allowing you to look your best without putting strain on your busy schedule.

WHAT IS *Virtue RF Microneedling?*

RF microneedling introduces radiofrequency energy into the deeper layers of the skin through tiny needles. These needles create channels in the skin, jumpstarting the skin's natural healing process. Radiofrequency energy not only helps boost collagen production, but contracts existing collagen to noticeably tighten the skin.

WHAT IS *CoolPeel*?

CoolPeel is a CO2 laser resurfacing treatment that improves the early signs of sun damage. CoolPeel delivers energy in a small dot pattern on the skin where it causes controlled thermal damage and boosts collagen production. However, CoolPeel is unique from traditional CO2 resurfacing because of its limited downtime.

“

I don't settle for anything less than the absolute best, which is why VirtueRF Microneedling has become an ongoing part of my skincare regimen.

- Danica Patrick

 VIRTUE_{RF}

WHAT ARE THE *Benefits of the Ultimate DUO?*

Targets aging and sun damaged skin

Diminishes fine lines

Improves skin laxity

Achieves better skin tone and texture

“

WHEN
SOMETHING
MAKES A
DIFFERENCE IN
